

The CIO's Guide to Hiring an IT Staff

If recent staffing surveys are correct, then IT hiring is a sellers market. In response, CIOs and their HR counterparts have to get more creative in their search for new talent.

To help with this challenge, Samuel Bright, a research analyst at Forrester, released a report that details new ways of finding and hiring sought after IT pros.

In his report Bright writes that recruiting in a tight talent market requires CIOs to shift their thinking about recruiting and broaden the places they look for talent. As part of this process, executives should:

- >>Stop searching for a silver bullet solution.
- >>Take charge of IT's recruiting destiny.
- >>Approach recruiting from a global perspective.
