

Enabling Rich Internet Applications for the Open Source World

With the work that has been done on Microsoft® Silverlight™, not only do Microsoft developers have the latest tools to develop Rich Internet Applications (RIAs), open source developers can share in these tools as well. Whether you write code in PHP, Python, Ruby or use Eclipse, there are tools available to you that let you develop the hottest RIA using Silverlight.

There are many exciting developments taking place in the world of Rich Internet Applications (RIAs) and many of them are taking place around Microsoft Silverlight. For some developers, Silverlight can be used to add eye-catching visual elements to a Web page or Internet application. For others, Silverlight lets them add the visual appeal and presentation of a client-side software application to their Web-based business application.

Download this eBook to explore how open source developers can take advantage of all that Microsoft has to offer developer of RIAs without forcing them to learn new tools. Topics include:

- Getting started with Silverlight for Eclipse
- RIA applications for Python and Ruby developers
- PHP Developers don't need Silverlight—or do they?
- Expression Web 2 for PHP developers—simplifying your PHP applications
